Capabilities

Built for legal precision

Grok understands legal language, citation formats, and jurisdictional nuance so your team can move faster with confidence.

Contract analysis	Review contracts at scale — extract key terms, flag non-standard clauses, and compare against your templates in seconds.
Legal research	Search across case law, statutes, and regulatory guidance with natural language queries. Get structured summaries with citations.
Compliance monitoring	Track regulatory changes across jurisdictions and map them to your internal policies. Get alerted when rules change.
Document drafting	Generate first drafts of NDAs, amendments, and policy documents based on your existing templates and guidelines.

How teams use it

From intake to deliverable

[Try for free](#)

Extract, classify, and summarize legal documents across matters — from contracts to court filings to regulatory submissions.

[Explore →](#)

Legal research synthesis

Compile case law, statutes, and secondary sources into structured memos with citations and relevance scoring.

[Explore →](#)

Policy and brief drafting

Generate first drafts of legal briefs, policy documents, and client memos grounded in your firm's templates and style.

[Explore →](#)

Integration

Works with your legal stack

Grok connects to your research platforms, document management systems, and e-discovery tools through the API and MCP integrations.
