```
import os
from xai_sdk import Client
from xai_sdk.chat import user, system

client = Client(
    api_key=os.getenv("XAI_API_KEY"),
)

chat = client.chat.create(model="grok-4.3")
chat.append(system("You are Grok, a chatbot inspired by the Hitchhiker'
chat.append(user("What is the meaning of life, the universe, and everyt
response = chat.sample()

print(response)
```

Models

Grok 4.3

New

Agentic tool calling, minimal hallucinations, non-reasoning mode.

Context	1 million tokens
Input	\$1.25 / 1M tokens
Output	\$2.50 / 1M tokens
Reasoning	Configurable ↗

Try in playground

Grok Build 0.1

New

Fast coding model trained specifically for agentic coding workflows.

Context	256k tokens
Input	\$1.00 / 1M tokens
Output	\$2.00 / 1M tokens

View model

Try in playground

Voice API

Real-time conversations, speech-to-text, and text-to-speech.

Agent	\$3.00 / hour
TTS	\$15.00 / 1M chars

 STT (Batch)	\$0.10 / hour
STT (Streaming)	\$0.20 / hour

Jump straight in

Try text, voice, image, and video models below

- Text Voice Image Video

Responses API

Generate text, have conversations, use tools, and build AI-powered applications.

- ✓ Generate text

- ✓ Multi-turn chat
- ✓ Function calling
- \$ \$1.25 / 1M input tokens
- \$ \$2.50 / 1M output tokens
